

DF-Direct Feed Range

Delivers unique benefits – eco-friendly, ecopure and economical. Offers significant cost advantages when compared with like for like water filtration alternatives.

Cleaner thinking. Greener solutions.

The eco3 Direct Feed (DF) range of products are designed to deliver environmentally friendly water filtration but in a cost effective manner. They represent the value component of the eco3 range.

This is achieved through the utilisation of our innovative and patented hygienic cartridge design which means that only the cartridge needs replacing – not the whole filter assembly. In addition, the feed and outlet pipes are fitted directly onto the filter itself meaning there is no requirement for a filter head with associated complexity and costs.

The result is a filter that delivers convenience and practicality in the field week in, week out and which does so in a way that saves you money and helps the environment.

Divided into two ranges, eco3 comprises Silver and Bronze variants, both of which are offered with scale reduction options:

eco3 Silver - provides a water filtration system with a balance of cost and certified performance. It has NSF 42 certification for the reduction of chlorine, particulate, taste and odour.

eco3 Bronze - provides entry level carbon filtration for the cost conscious customer whilst retaining all of the other features and benefits of the eco3 DF range.

eco3+ Range - available on all of the DF silver and bronze product variants with additional polyphosphate for the cost effective inhibition of scale in hard water areas. Suitable for for both cold and hot water applications.

NSF is an accredited, third-party certification body that tests and certifies products to verify they meet these public health and safety standards. Products that meet these standards bear the NSF Mark, which is respected by consumers, manufacturers, retailers and regulatory agencies at the local, state, federal and international level.

Visit www.NSF.org for the claims associated with products that are NSF listed

Also available

Mounting Options

The eco3 DF range can be fixed to the wall at the point of installation utilising the white wall mounting bracket that is provide with the filter. **See picture A.**

In addition, Icon has developed a unique mounting bracket for the eco3 DF product which allows it to be fixed directly onto the condenser on the back of a water cooler. **See picture B.**

These are available from Icon and provide a simple, convenient and quick means of securing the filter to a water cooler to provide a neat and professional installation.

Multiple filter Installations

Where more than one filter is required for an installation, either in parallel or in sequence, we have available the eco3 DF mounting system which can accommodate 2, 3 or 4 filter combinations.
